

SpaciMS

Multi-channel Inlet for Intra-Catalyst Gas Analysis

SpaciMS Schematic

Schematic HPR20 SpaciMS system for spatially resolved catalysis studies

- Capillaries are inserted into the catalyst monolith and are moved by the integrated z-motion drive.

SpaciMS Probe Layout

Twin Inlet SpaciMS

- For Sampling inlet/outlet gas composition of Diesel Particulate filters

SpaciMS Probe

SpaciMS Analysis

- SpaciMS allows mapping of reaction profiles inside the catalyst and not just at the exhaust

SpaciMS Analysis

- Different catalyst reaction zones can be monitored with the intra-catalyst probes

Features

- Up to 16 capillaries and thermocouples
 - Minimally invasive
- Identify reaction zones inside the catalyst monolith
- Integrated capillary channel sampling and z-drive positioning
 - Optional furnace and gas supply control
